

Jeffrey S. Draeger
Director of Patent Strategy & Analysis
Intel Corporation

Mr. Draeger is currently the Director of Patent Strategy & Analysis at Intel Corporation. As Director of Patent Strategy and Analysis, Mr. Draeger focuses on portfolio development strategy and pre-litigation use of Intel's portfolio and analysis including defense against and/or acquisition of third party patents. Mr. Draeger has been heavily involved in key litigation and licensing efforts related to processor technology, including both offensive licensing and litigation efforts and defending the corporation against other companies.

Previously, Mr. Draeger focused on portfolio development and prosecution management, including managing a group of over 30 patent attorneys and agents responsible for the development of the patent portfolios for Intel's core technologies (i.e., processors, chipsets, interconnect, etc.).

Prior to managing portfolio development and prosecution, Mr. Draeger focused on preparation and prosecution of patent applications, patent analysis, patent portfolio development. Mr. Draeger was also a microprocessor designer at Intel before going through law school at night at Santa Clara University.
