

Ashley Tehranchi
Entrepreneur

Ashley Tehranchi is a serial entrepreneur in the biotech area. Her most recent venture is in the therapeutics space. Prior to starting her new company, Ashley co-founded Mammoth Biosciences, a developer of low-cost, effective, and easy-to-use CRISPR-based disease diagnostics. In addition to being the co-founder, Ashley also was the company's chief technology officer. After earning a Doctor of Philosophy in cellular and molecular biology from Stanford University, Ashley worked at Celgene as a postdoctoral researcher. She also worked at Baylor College of Medicine as a research technician. Ashley earned a Bachelor of Science in biology from University of Houston-Downtown.
