How do I operate the equipment?

To power on the system, press the power button at the home screen. This will power on the system and lower the projection screen.

PC/Mac
This will select the desktop you'd like to use in the classroom

Blu-ray
You are able to play Bluray or DVD discs. The Bluray Control screen will provide you with c ontrol for common functions such as play, rewind, fast-forward, and stop.

Apple TV
All our classrooms are equipped with Apple TV. Look for the room on your Apple Device then input the password on the projector screen to connect.

Laptop
VGA and HDMI connections are provided at the instructors podium. Select the one that connects to your laptop.

Audio Control
Control volume levels in the room.

Camera Control
This is used to control and adjust the camera for both classroom capture and video conferencing. The camera selected is what is used for capture. You can select between two cameras. Program

Volume
Volume control for the entire classroom.

Projector Mute
This will blank out the projector. Tap to toggle on/off.

Audio/Camera/Bluray/Apple TV Control
This will show you the control options for each source.

Please remember to shut off the system after you are done using the room. This is done by tapping **System Off**. When prompted, please tap **Yes**.
