How do I operate the equipment?

To power on the system, press the power button at the home screen. This will power on the system and lower the projection screen.

PC/Mac

This will select the desktop you'd like to use in the classroom

Blu-ray

You are able to play Blu-ray or DVD discs. The Blu-ray Control screen will provide you with control for common functions such as play, rewind, fast-forward, and stop.

Apple TV

All our classrooms are equipped with Apple TV. Look for the room on your Apple Device then input the password on the projector screen to connect.

Laptop

VGA and HDMI connections are provided at the instructors podium. Select the one that connects to your laptop.

Audio Control

Control volume levels in the room.

Camera Control

This is used to control and adjust the camera for both classroom capture and video conferencing. The camera selected is what is used for capture. You can select between two cameras. Program

Volume

Volume control for the entire classroom.

Projector Mute

This will blank out the projector. Tap to toggle on/off.

Audio/Camera/Bluray/Apple TV Control

This will show you the control options for each source.

Please remember to shut off the system after you are done using the room. This is done by tapping **System Off**. When prompted, please tap **Yes**.
