

Paul Lippe Bio
February 2010

Paul Lippe is the CEO of Legal OnRamp, the leader in legal Web 2.0. Legal OnRamp was first developed at a legal department productivity and collaboration platform for Cisco Systems, and is the first Web 2.0 system to integrate secure, private departmental platforms with a broader “walled garden” public community.

From 1992-1999, Paul Lippe was an executive at Synopsys, an electronic design automation company. During that time Synopsys grew from \$63MM to \$800MM in revenue. Paul was at various times Senior Vice President, General Counsel, and ran Business Development and Corporate Marketing. Synopsys is the global leader in sophisticated technology for chip design.

After leaving Synopsys in late 1999, Paul became CEO of Stanford SKOLAR, a medical digital library and e-learning company sponsored by Stanford Medical School. SKOLAR was recognized as a leader in self-directed learning, with the first approved in-context learning system.

Paul is a frequent speaker on legal and operational issues, and has spoken at Harvard Business School, Stanford Business School, Stanford Law School, the Law Firm Leaders’ Forum, Richard Susskind's Scotland retreat on Law, the Stanford General Counsels’ Institute, the World Pension Forum, the Stanford Asia Forum and Tsinghua University (Beijing), and published in diverse periodicals such as the Huffington Post, the American Lawyer, National (Canadian Bar Association), the ACC Docket, the San Jose Mercury News, Electronic News and Electronic Engineering Times.

Paul was a Special Assistant to Senator Daniel Patrick Moynihan (D. NY), Member and Chairman of the Colorado Air Quality Control Commission 1987-1992, and a founder of TechNet.

Paul is a graduate of Yale College and Harvard Law School. He is married to Nancy White Lippe and they have 4 children.
